

# **Practical Sheet 02**

## 1. Constraints

SQL constraints are used to specify rules for the data in a table. Some of the constraints used in MySQL are as follows.

- NOT NULL - Ensures that a column cannot have a NULL value
- UNIQUE - Ensures that all values in a column are different
- PRIMARY KEY - A combination of NOT NULL and UNIQUE. Uniquely identifies each row in a table
- FOREIGN KEY - Prevents actions that would destroy links between tables
- CHECK - Ensures that the values in a column satisfies a specific condition
- DEFAULT - Sets a default value for a column if no value is specified

## Example of Constraints

Create a database named Company, use it and create the tables below.

### NOT NULL, PRIMARY KEY,CHECK, DEFAULT

```
CREATE TABLE EMPLOYEE(  
  Fname VARCHAR(15) NOT NULL,  
  Minit CHAR,  
  Lname VARCHAR(15) NOT NULL,  
  Ssn CHAR(9) NOT NULL,  
  Bdate DATE,  
  Address VARCHAR(30) DEFAULT 'Colombo',  
  Sex CHAR,  
  Age INT,
```

Salary DECIMAL(10,2),  
Super\_ssn CHAR(9),  
Dno INT NOT NULL,  
PRIMARY KEY (Ssn),  
CHECK (Age>=18));

#### FOREIGN KEY, UNIQUE

CREATE TABLE DEPARTMENT  
( Dname VARCHAR(15) NOT NULL,  
Dnumber INT NOT NULL,  
Mgr\_ssn CHAR(9) NOT NULL,  
Mgr\_start\_date DATE,  
PRIMARY KEY (Dnumber),  
UNIQUE (Dname),  
FOREIGN KEY (Mgr\_ssn) REFERENCES EMPLOYEE(Ssn) );

#### Query 1 to Validate Examples

INSERT INTO EMPLOYEE(  
Fname, Minit, Lname, Ssn, Bdate, Address, Sex, Age, Salary, Super\_ssn, Dno)  
VALUES  
( 'Jennifer', 'S', 'Wallace', '987654321', '1941-06-29', '291 Berry, Bellaire,  
TX', 'F', 17, 43000, '888665555', 4 );

#### Query 2 to Validate Examples

INSERT INTO EMPLOYEE(  
Fname, Minit, Lname, Ssn, Bdate, Sex, Age, Salary, Super\_ssn, Dno)  
VALUES

('Jennifer','S','Wallace','987654321','1941-06-29','F',20,43000,'888665555',4);

### Activity

Create the below tables and insert data to the respective tables.

#### **EMPLOYEE**

| Fname    | Minit | Lname   | Ssn       | Bdate      | Address                        | Sex | Salary | Super_ssn | Dno |
|----------|-------|---------|-----------|------------|--------------------------------|-----|--------|-----------|-----|
| John     | B     | Smith   | 123456789 | 1955-01-09 | 731 Fondren,<br>Houston,<br>TX | M   | 30000  | 33344555  | 5   |
| Franklin | T     | Wong    | 33344555  | 1955-12-08 | 638 Voss,<br>TX                | M   | 40000  | 88866555  | 5   |
| Alicia   | J     | Zelaya  | 999887777 | 1968-01-19 | 3321 Castle,<br>Houston,<br>TX | F   | 25000  | 987654321 | 4   |
| Jennifer | S     | Wallace | 987654321 | 1941-06-29 | 291 Berry,<br>Bellaire,<br>TX  | F   | 43000  | 888665555 | 4   |
| Ramesh   | K     | Narayan | 666884444 | 1962-09-15 | 975 Fire Oak,<br>Humble,<br>TX | M   | 38000  | 333445555 | 5   |
| Joyce    | A     | English | 453453453 | 1972-07-31 | 5631 Rice,<br>Houston,<br>TX   | F   | 25000  | 333445555 | 5   |
| Ahmad    | V     | Jabber  | 987987987 | 1969-03-29 | 980 Dallas,<br>Houston,<br>TX  | F   | 25000  | 987654321 | 4   |

|       |   |      |              |                |                                 |   |       |           |   |
|-------|---|------|--------------|----------------|---------------------------------|---|-------|-----------|---|
| James | E | Borg | 88866<br>555 | 1937-<br>11-10 | 450<br>Stone,<br>Houston,<br>TX | M | 55000 | 987987987 | 1 |
|-------|---|------|--------------|----------------|---------------------------------|---|-------|-----------|---|

## PROJECTS

| Pname           | Pnumber | Plocation  | Dnum |
|-----------------|---------|------------|------|
| ProductX        | 1       | Bellaire   | 5    |
| ProductY        | 2       | Sugarland' | 5    |
| ProductZ        | 3       | Houston    | 5    |
| Computerization | 10      | Stafford   | 4    |
| Reorganization  | 20      | Houston    | 1    |
| Newbenefits     | 30      | Stafford   | 4    |

## DEPARTMENT

| Dname          | Dnumber | Mgr_ssn   | Mgr_start_date |
|----------------|---------|-----------|----------------|
| Research       | 5       | 333445555 | 1988-05-22     |
| Administration | 4       | 987654321 | 1995-01-01     |
| Headquarters   | 1       | 888665555 | 1981-06-19     |

## 2. Select

The SQL SELECT statement returns a result set of records, from one or more tables.

### The SELECT-FROM-WHERE Structure of Basic SQL Queries

SELECT <attribute list>

FROM <table list>

WHERE <condition>;

where

- <attribute list> is a list of attribute names whose values are to be retrieved by the query.
- <table list> is a list of the relation names required to process the query.
- <condition> is a conditional (Boolean) expression that identifies the tuples to be retrieved by the query.

#### SELECT \* Example

SELECT \* FROM EMPLOYEE;

#### SELECT Column Example

SELECT Fname, Address FROM EMPLOYEE;

#### SELECT Distinct Example

SELECT DISTINCT Address FROM EMPLOYEE;

#### WHERE Clause Example

SELECT \* FROM EMPLOYEE

WHERE Address = 'Kandy';

#### Operators in the WHERE clause

The following operators can be used in the WHERE clause:

|    |                       |
|----|-----------------------|
| =  | Equal                 |
| >  | Greater than          |
| <  | Less than             |
| >= | Greater than or equal |
| <= | Less than or equal    |

|         |   |
|---------|---|
| <>      | Not equal. Note: In some versions of SQL this operator may be written as != |
| BETWEEN | Between a certain range   |
| LIKE    | Search for a pattern  |

1. Retrieve the birth date and address of the employee(s) whose name is 'John B. Smith'.

**SELECT Bdate, Address**

**FROM EMPLOYEE**

**WHERE Fname = 'John' AND Minit = 'B' AND Lname = 'Smith';**

### **Retrieve data from multiple tables**

2. Retrieve the name and address of all employees who work for the 'Research' department.

**Q1**

**SELECT Fname, Lname, Address**

**FROM EMPLOYEE, DEPARTMENT**

**WHERE Dname = 'Research' AND Dnumber = Dno;**

### **Ambiguous Attribute Names, Aliasing, Renaming, and Tuple Variables**

In SQL, the same name can be used for two (or more) attributes as long as the attributes are in different tables.

If this is the case, and a multi-table query refers to two or more attributes with the same name, we must qualify the attribute name with the relation name to prevent ambiguity.

This is done by prefixing the relation name to the attribute name and separating the two by a period.

To prevent ambiguity, Q1 should be rephrased as below.

```
SELECT Fname, EMPLOYEE.Name, Address  
FROM EMPLOYEE, DEPARTMENT  
WHERE DEPARTMENT.Name = 'Research'  
AND DEPARTMENT.Dnumber = EMPLOYEE.Dnumber;
```

Fully qualified attribute names can be used for clarity even if there is no ambiguity in attribute names.

Q1 can be rewritten as below with fully qualified attribute names.

```
SELECT EMPLOYEE.Fname, EMPLOYEE.LName, EMPLOYEE.Address  
FROM EMPLOYEE, DEPARTMENT  
WHERE DEPARTMENT.DName = 'Research'  
AND DEPARTMENT.Dnumber = EMPLOYEE.Dno;
```

We can also rename the table names to shorter names by creating an alias for each table name to avoid repeated typing of long table names.

```
SELECT E.Fname, E.LName, E.Address  
FROM EMPLOYEE AS E, DEPARTMENT AS D  
WHERE DEPARTMENT.DName = 'Research'  
AND D.Dnumber = E.Dno;
```

### **Unspecified WHERE Clause and Use of the Asterisk**

2. Select all EMPLOYEE Ssns (Q2) and all combinations of EMPLOYEE Ssn and DEPARTMENT Dname (Q3) in the database.

```
Q2: SELECT Ssn FROM EMPLOYEE;
```

```
Q3: SELECT Ssn, Dname FROM EMPLOYEE, DEPARTMENT;
```

```
SELECT EMPLOYEE.Fname, EMPLOYEE.LName,  
EMPLOYEE.Address  
FROM EMPLOYEE, DEPARTMENT  
WHERE DEPARTMENT.DName = 'Research' AND  
DEPARTMENT.Dnumber = EMPLOYEE.Dno;
```

#### Query 2

```
SELECT E.Fname, E.LName, E.Address  
FROM EMPLOYEE AS E, DEPARTMENT AS D  
WHERE D.DName = 'Research' AND D.Dnumber = E.Dno;
```

3. For every project located in 'Stafford', list the project number, the controlling department number, and the department manager's last name, address, and birth date.

```
SELECT Pnumber, Dnum, Lname, Address, Bdate  
FROM PROJECT, DEPARTMENT, EMPLOYEE  
WHERE Dnum = Dnumber AND Mgr_ssn = Ssn AND  
Plocation = 'Stafford'
```

```
CREATE TABLE DEPARTMENT(  
Dname VARCHAR(15) NOT NULL,  
Dnumber INT NOT NULL,  
Mgr_ssn CHAR(9) NOT NULL,  
Mgr_start_date DATE,  
PRIMARY KEY (Dnumber),  
UNIQUE (Dname),  
FOREIGN KEY (Mgr_ssn) REFERENCES EMPLOYEE(Ssn) );
```

```
INSERT INTO EMPLOYEE(  
Fname, Minit, Lname, Ssn, Bdate, Address, Sex, Salary, Super_ssn, Dno)  
VALUES ('John','B','Smith','12345789','1965-01-09','731 Fondren, Houston,  
TX','M',30000,'33344555',5);
```

```
INSERT INTO EMPLOYEE(  
Fname, Minit, Lname, Ssn, Bdate, Address, Sex, Salary, Super_ssn, Dno)  
VALUES ('Franklin','T','Wong','33344555','1955-12-08','638 Voss, TX','M',40000,'88866555',5);
```
