

Introduction to Internet and World Wide Web (WWW)

Introduction to Internet

- In the past, most computer applications ran on computers that were not connected to one another, whereas today's Internet applications can be written to communicate among computers throughout the world
- The Internet—a global network of computers—was made possible by the *convergence of computing and communications technologies*. In the late 1960s, ARPA (the Advanced Research Projects Agency)

Networks are used to:

- Facilitate communication via email, video conferencing, instant messaging, etc.
- Enable multiple users to share a single hardware device like a printer or scanner.
- Enable file (data) sharing across the network.
- Allow for the sharing of software or operating programs on remote systems.
- Make information easier to access and maintain among network users.

The Internet

The Internet is a

- worldwide collection of computer networks
- cooperating with each other
- to exchange data
- using a common software.

History

- It started with four interconnected computers in 1969
- Known as ARPAnet (Advanced Research Projects Agency in United states.

Advantages of the Internet

- Faster Communication
- Rich Information Resources
- Infinite Education
- Entertainment for Everyone
- Social Networking and Staying Connected
- Online Services and E-commerce

Disadvantages of the Internet

- Theft of Personal Information
- Spamming
- Malware Threats
- Age-inappropriate Content
- Social Isolation, Obesity, and Depression

The World Wide Web

- **World Wide Web(WWW)** is a part of the Internet that consists of Internet connected computers called **Web Servers** that store electronic documents called **Web Pages**.
- **Web Page** is a specially formatted document that can contain images, text, interactive elements, and hyperlinks, which links to other pages.
- **Web Site** is a group of related Web Pages.
- A web site's primary page known as **Home Page**, typically introduces the web site and provide information about the site's purpose and content.

History

- Tim Berners-Lee: World Wide Web 1989
- Dream of sharing information back and forth
- Mosaic Web browser in 1993
- Writing to the web required knowledge of HTML codes and more.

Ways to Access the Internet and the web – Cont.

Web Browsers

- To view Web pages, you need a Web Browser.
- **Web Browser** is a software program that requests, downloads, and displays Web pages stored on *Web Server*.

Ways to Access the Internet and the web – Cont.

- You can access a Web page by entering its unique address, called the **Uniform Resource Locator (URL)**, in a browser's address bar.
- URL consist of a *domain name* and *top-level domain designation*.
- Many URLs also included, folder and files names are separated by forward slash characters following the top-level domain designation.

3.Ways to Access the Internet and the web – Cont.

- A URL identifies a computer on the Internet

Web 2.0

The Read/Write Web

The New World Wide Web

- New way software developers and users utilize the web.
- 2003 - sites utilize tools that make it easy to publish to the web.
- No longer limited to “consuming” information.
- Multimedia publishing has exploded.

Useful Web 2.0 Tools

- Weblogs
- Wikis
- Real Simple Syndication (RSS)
- Aggregators
- Social Bookmarking and Networking
- Online Photo Galleries
- Audio/video-casting

*Not the only web 2.0 tools! Keep educational uses in mind when looking at these.

Weblogs (Blogs)

- Easily created/updated sites.
- Publish instantly from any internet connection.
- Interactive - comment, question, link, converse.

Wikis

- Collaborative page.
- Anyone can add or edit content.
- Wikipedia - friend or foe?
- Wikispaces

Real Simple Syndication

- Subscribe to “feeds” from your favorite sites.
- New information is sent to you.
- Reduces research time.

Aggregators

- There are a few different ways for an aggregator site to operate, but, generally, they don't produce content of their own.
- All of the content will be collected from other websites via users, webmasters, or RSS feeds. The best aggregator sites will display content with complete attribution and a link back to the original creator.
- [Feedly](#)
- [Panda](#)
- [Techmeme](#)

Online Photo Galleries

- Publish photos online.
- Comment, and share ideas.
- Create photo stories and presentations.

Audio/video-casting

- Produce audio and video recordings.
- Publish them easily to the web.
- Creates a world-wide audience.

- What are some of the benefits and challenges of utilizing web 2.0 tools?

Definition of E-Commerce

- *E-Commerce or Electronic commerce is a process of buying, selling, transferring, or exchanging products, services, and/or information via electronic networks and computers*

E-Commerce Categories

- Two major categories
- Other categories

Two Major Categories

- **Business-to-consumer (B2C) :**

Online transactions are made between businesses and individual consumers. E.g. Amazon.com, eBay.com.

- **Business-to-business (B2B):**

Businesses make online transactions with other businesses.

Benefits of E-Commerce

- Benefits to organizations
- Benefits to consumers

Benefits to organizations

- Global reach
- Cost reduction
- Supply chain improvements
- Extended hours: 24/7/365
- Customization
- Improved customer relations

Benefits to consumers

- More products and services
- Cheaper products and services
- Instant delivery
- Information availability
- Participation in auctions

Business applications

- Email
- Instant messaging
- Online shopping and order tracking
- Online banking
- Shopping cart software
- Teleconferencing
- Electronic tickets

Online Shopping

- Online shopping is the process of buying goods and services from merchants who sell on the Internet
- Online consumers are evenly split between men and women and tend to be better educated, younger, and more affluent than the general population

Online Shopping (cont)..

- Advantages:
 - 24-hour access
 - Ability to comparison shop
 - The in-home privacy
 - Variety

Online Shopping (cont)..

- Favourite websites for shopping include those featuring:
 - Event tickets
 - Online periodicals subscription
 - Flowers and gifts
 - Consumer electronics
 - Travel

Online Shopping (cont)..

How do you buy something

Interesting Facts and Statistics

8

- Every 1.2 seconds, a Canadian makes a purchase with their PayPal account
- Almost 20 per cent of Canadians make three or more online purchases per month (comScore 2009).
